

Enter setup

Control character conversion

GS

<GS>

(GS)

'GS'

`GS`

GS_124

End character conversion on

End character conversion off

Output as is

Exit setup

For example: add 'GS' and enter characters to the barcode, and scan the following barcode from top to bottom to set it up successfully.

Enter setup

GS

'GS'

End character conversion on

Exit setup

Option 3 (Send a special character, ALT + XXX (ASCII), in this case, the GS character is ALT + 029. (This is how the scanner works in VCOM, but not in the USB keyboard)

This problem can be solved by setting the following barcode

Enter setup

Output Characters ALT+Numeric keys

Exit setup
